

MASTER

POWER BI

IN 16-DAYS

@haseebsuhail

INDEX

Below is a roadmap with stages and practice questions for each stage to help you get started:

STAGE:1	INTRODUCTION TO POWER BI	1
STAGE:2	DATA LOADING	2
STAGE:3	DATA MODELING	3
STAGE:4	DATA VISUALIZATION	4
STAGE:5	ADVANCED TOPICS	5
STAGE:6	DATA TRANSFORMATION	6
STAGE:7	REAL WORLD PROJECT	7
STAGE:8	REVISION	8

STAGE:1

BASICS

DAY 1

INTRODUCTION TO POWER BI

- Understand what Power BI is and its key components.
- Install Power BI Desktop.
- Explore the Power BI interface

DAY 2

PRACTICE QUESTIONS

- What are the three main components of Power BI?
- How do you create a new report in Power BI Desktop?
- Explore the Power BI Desktop interface and locate the different panes and tools.

STAGE:2

DATA LOADING

DAY 3

DATA SOURCES AND TRANSFORMATION

- Learn to connect to various data sources (Excel, databases, web, etc.).
- Load data into Power BI.
- Understand data transformation and cleaning techniques.

DAY 4

PRACTICE QUESTIONS

- Connect Power BI to a sample Excel file and load data.
- How can you filter and clean data in Power Query Editor?
- Explain the importance of data profiling.

STAGE:3

DATA MODELING

DAY 5

DATA MODELING AND RELATIONSHIPS

- Learn about data modeling concepts.
- Create relationships between tables.
- Define measures and calculated columns.

DAY 6

PRACTICE QUESTIONS

- Create a relationship between two tables in Power BI.
- What's the difference between a measure and a calculated column?
- Write a DAX expression to calculate total sales.

STAGE:4

DATA VISUALIZATION

DAY 7

VISUALIZATION

- Explore various visualization types (charts, tables, maps, etc.).
- Create interactive reports and dashboards.
- Apply formatting and themes.

DAY 8

PRACTICE QUESTIONS

- Create a bar chart representing product sales.
- How can you add a slicer to filter data in a report?
- Customize the color scheme of a report.

STAGE:5

ADVANCED TOPICS

DAY 9

ADVANCED TOPICS

- Learn about advanced DAX functions.
- Implement time intelligence calculations.
- Understand custom visuals and Power BI Service features.

DAY 10

PRACTICE QUESTIONS

- Write a DAX expression for year-over-year growth.
- Create a custom measure for moving averages.
- Publish a report to Power BI Service and share it with a colleague.

STAGE:6

DATA TRANSFORMATION

DAY 11

DATA TRANSFORMATION & ETL

- Deep dive into Power Query.
- Master ETL (Extract, Transform, Load) techniques.
- Automate data refresh.

DAY 12

PRACTICE QUESTIONS

- Perform advanced data transformations using Power Query.
- Schedule data refresh for a Power BI report.
- Troubleshoot data refresh issues.

STAGE: 7

REAL-WORLD PROJECT

DAY 13

REAL-WORLD PROJECTS

- Work on real datasets and projects.
- Apply all the skills you've learned.
- Explore Power BI's integration with other tools (e.g., Excel, SharePoint)..

DAY 14

PRACTICE QUESTIONS

- Choose a dataset and create a complete Power BI report from scratch.
- Share your project with peers or mentors for feedback.

STAGE: 8

RECAP

DAY 15

RECAP AND FINAL PRACTICE

- Review key concepts and techniques.
- Practice additional exercises.
- Set personal goals for further learning.

DAY 16

PRACTICE QUESTIONS

- Self-assessment: Take a quiz covering essential Power BI topics.
- Identify areas for improvement and plan your next steps in mastering Power BI.
